

PRISONMEDIA

Inmates' Multimedia Solution

PrisonMedia is a prison cell multimedia solution based on the latest technological communication and security standards. The system offers inmates secured access to TV and radio as well as - optionally - secured access to telephony, Internet, e-mail and e-learning. PrisonMedia is available in two versions: as a wallmount/tabletop unit (**PRISONMEDIATV**) and as a mobile Tablet PC version (**PRISONMEDIAMOBILE**).

Prison facilities benefit from a standardised prison cell media equipment and thus, from a significant reduction of the regular inspection work. Coming directly from the manufacturer, PrisonMedia is 100% „clean“ when entering prison. The system housings have no hiding spaces and are protected against any form of manipulation by malfunction sensors and a tampering alarm. Any sabotage or manipulation attempt is immediately reported to the prison staff. PrisonMedia is centrally controlled and monitored by PriSec ControlCenter, the central management system for PriSec's entire portfolio of communications, multimedia and security technology solutions.

PRISONMEDIA TV

- Compact multimedia solution for the prison cell (wallmount/tabletop unit)
- Function modules: IPTV, radio, film (VOD, DVD, recording), music (MOD, CD), IP telephony, Internet, e-mail, e-learning, counselling, notice board (internal facility notices), shopping...
